

Cocktail Party

Join us to Celebrate the release of the latest editions of **PIA Technical & Pipe Friction Handbooks**

The Pump Industry has long been producing these popular publications as training aids and guides to designing efficient pumping systems.

As more work is done in this area, it is important that our publications are continuously updated to meet the needs of pump users, as the pressure on a greener and more sustainable environment increase in developed countries like Australia.

We are pleased to announce a Book Launch on **Tuesday 16 July 2013** for these two new publications and we invite PIA members and other purchasers of these publications to a cocktail party to be held in the Conference Room of Sustainability Victoria at:-

Level 28, Urban Workshop, 50 Lonsdale Street, Melbourne Vic 3000

The presentation will begin at **5.00 pm through to 7.00 pm** and there will be an opportunity to see the new editions as well as purchase these at a concessional rate on the day or place an order for immediate delivery from stock.

1) Technical Handbook

This has been subjected to a major update with a brand new chapter on "Efficient operation of Pumping Systems". Extensive additions have also been made on "Positive displacement pumps" and "Sewage pumping stations"

2) Pipe Friction Handbook

There has been a rationalisation of some of the pipe types and reference to Australian standards has been made in this updating process to bring it in line with the latest friction calculation requirements.

We are grateful to Sustainability Victoria for assisting us with this event and there will be an opportunity to meet & chat with some of the contributors to the new Technical Handbook on the night.

Don't miss this opportunity to mix in and network with Australia's Pump Experts.

Registration is required to receive an invitation, so kindly contact our Secretary

Kevin Wilson on pumpsaustralia@bigpond.com

or visit our website www.pumps.asn.au for registration
